About DQP

The Delaware Quality Partnership (DQP) is a coalition of State employees dedicated to promoting continuous quality improvement (CQI) for State government. Through networking and resource sharing, the partnerships among State agencies enhance services for a more efficient and customer-oriented government. The partnership uses the Malcolm Baldrige criteria as its foundation in continuous quality improvement and to help guide partners in their quality journey.

Vision

Excellence in State Government.

Mission

To promote excellence in organizational performance to improve service delivery to the customers and stakeholders of Delaware's State Government.

Environmental Control, 302.739.9942

Treasurer:

Carolyn Dunch

Department of Natural Resources and
Environmental Control, 302.739.9000

Programs & Meetings

The Delaware Quality Partnership offers a number of opportunities for you to network and learn how to implement quality into your organization. The partnership meets the first Friday of every even-numbered month to share ideas and successes in continuous quality improvement.

The meetings host an array of speakers who present on a variety of quality-related subjects and

discuss methods and techniques to implement quality in State government. Members who attend the DQP meetings gain valuable knowledge from the presentations, and increase their awareness and expectations of the possibilities of implementing quality.

Successes

The DQP is successful in bringing State agencies together in a formal environment to share information and resources for improved services to the citizens of Delaware. Agency leaders are aware of the benefits the DQP provides, and are becoming more interested and supportive in the CQI effort. The DQP is leading the way toward a more unified approach to a more efficient State government.

The DQP gained recognition from the governor's office, cabinet secretaries, and upper management for generating a positive and productive means of improving organizational excellence within the State.
